

NSA INDUSTRIES, LLC—THE COMPANY

NSA Industries is a value-added manufacturer in Northern New England offering comprehensive services in assembly, metal fabrication, machining and powder coating.

NSA'S MISSION:

To be the preferred supply chain partner to the North East Region's leading manufacturers providing quality parts, on-time at the most competitive prices supported by a strong culture of continuous improvement, superb customer care and an unwavering commitment to the well being of its people and the community.

WHAT WE DO:

NSA works collaboratively with customers to develop manufacturing solutions, including:

Engineering and Prototype Development – Utilizing state-of-the-art CAD software to refine the manufacturability of the parts and developing full-size prototypes to prove the processes.

Metal Fabrication – Building equipment or component parts by cutting, shaping, welding and assembly of various materials.

Machining – Turning, drilling, boring or milling of metal and plastic using power-driven machine tools with a sharp cutting tool to mechanically cut the material to achieve a desired shape.

Powder Coating – Applying dry paint to parts and baking them to form a continuous film that is more durable than conventional “wet” painting. Powder coating provides unlimited color choices, scratch resistant surfaces and uses fewer toxins in the process.

WHO WE ARE:

The Company is one of Northern Vermont's largest employers with 250 employees. The average tenure of an NSA employee is 8 years, guided by the experienced hands who have been with the company since the beginning. The employees work in two facilities within Lyndonville totaling 125,000 sq. ft. The establishment of manufacturing cells for select customers has created many cross functional teams within buildings. Lean Six Sigma Black Belts and Green Belts on staff lead the company in lean manufacturing practices and continuous improvement initiatives.

HISTORY:

Founded in 1982 in St. Johnsbury, Vermont by Neal S. Austin, NSA Industries LLC has a proud historical tradition. Neal grew the company incrementally from being a supplier to his first customer, the manufacturer of the Garden Way Garden Cart, to serving some of the leading manufacturers in Northern New England. Today the Company is now owned by a small group of shareholders and management.

INDUSTRIES SERVED:
